Bachelor of Science in History (BS/HST)
Program Student Learning Outcomes

1. Students will explain the significance of major historical events.
2. Students will evaluate the influence of leadership and diversity on global historical outcomes.
3. Students will research and analyze historical evidence.
4. Students will use secondary sources and valid interpretation methods to support historical narratives and arguments.
5. Students will assess the vast cultural, social, and political differences and similarities human societies have produced over time and around the world.
