Bachelor of Science in Criminal Justice Administration (BSCJA) Program Student Learning Outcomes

1. Students will be able to demonstrate the ability to critically analyze criminological theory, and identify its impact on society and public policy.

2. Students will demonstrate a clear understanding of ethical principles and standards for all facets of the criminal justice system.

3. Students will be able to identify dynamic human and organizational factors as a process, while applying sound problem-solving and critical-thinking skills to resolve conflict and achieve the desired, measurable outcome.

4. Students will demonstrate the application of quantitative and qualitative research methods, and apply each to individualized and complex criminal justice situations.

5. Students will demonstrate robust leadership qualities, and exhibit sound management skills aimed at fostering effective communication and performance in a dynamic, collaborative and diverse working environment.

6. Students will be able to apply knowledge and skills to successfully collaborate with diverse groups and engage them in best practices. Students also will be able to demonstrate the application of research and evaluation methods to identify trends and evidence-based practices within the components of the criminal justice system and their specializations.

7. Students will demonstrate the knowledge and skills to successfully collaborate with diverse groups and engage them in best practices of the criminal justice profession.
