Environmental Sustainability Certificate

Help your organization manage its environment.

Do you want to help individuals and organizations make responsible decisions about our natural world? Concepts for preservation and forward-thinking innovation are themes you will study in the Environmental Sustainability Certificate program. This certificate provides an overview of sustainable practices and applications from the environmental science perspective. Current and historical environmental issues are evaluated by examining the impact these issues have on society and the environment. Sustainable practices are analyzed to determine the relevant course of action for environmental management.

Learn tangible skills:
- Green energy practices
- Sustainable resource management
- Sustainable agriculture practices
- Applying ethics to proposed solutions
- Knowledge of government environmental policies and regulations

Study a solid core curriculum:
- Energy and the environment
- Industrial ecology
- Sustainable agriculture
- Green building and landscape
- Sustainable ecosystems
- Conservation

Prepare for a variety of careers in sustainability in the public and private sectors, including:
- Environmental analyst
- Environmental health and safety specialist
- Environmental protection specialist
- Environmental specialist
- Sustainability officer

Call 800.475.1487 to speak with your Enrollment Representative.
Benefits of being a Phoenix:

- Learn from faculty with an average of 19 years of experience.
- Connect with over 890,000 alumni.
- Take classes online, on campus or both.

The Environmental Sustainability Certificate requires a minimum of 18 credits, which may come from a combination of required and elective courses.
