If you’re interested in shaping the future of healthcare, our Master of Health Administration (MHA) could be what you’re looking for. You’ll build your competence in areas that can help prepare you for improving patient, population and provider outcomes, and for collaborating with diverse organizations across the healthcare industry.

Our curriculum is designed to align with leading industry and academic organizations like the American College of Healthcare Executives (ACHE) and the Association of University Programs in Health Administration (AUPHA). The program aims to expand your knowledge in the areas of industry and organizational dynamics, environmental scanning, development of an authentic and transparent leadership style, and personal and corporate social responsibility. You’ll also learn how to create strategic alliances with other leaders and maintain them through mergers and acquisitions.

Since we joined the Healthcare Information and Management System Society’s (HIMSS) Academic Organizational Affiliate (AOA) program, we can offer our eligible healthcare and health IT students a complimentary HIMSS individual membership. The membership connects students with networking opportunities, career services, professional development opportunities and much more — helping you get more from your MHA.

Explore the offerings and information below to see how this program can help prepare you to become a leader well-equipped to transform the healthcare industry.
## Objectives

The Master of Health Administration v004 provides leaders and aspiring leaders in the health sector with the insight and skills necessary to drive the future of healthcare by facilitating cross-system transformation and improving outcomes for patients, populations, and providers. The program's curriculum, built via close collaboration with industry and academic experts, anticipates emerging needs trends in the health sector. Areas of inquiry include industry and organizational dynamics in the health sector, visioning the future, forming strategic relationships, leading with authenticity in health care systems, creating a sustainable personal legacy, and transformation and execution in diverse health system contexts.

## Requirements and Prerequisites

You'll need 36 credits to complete the program. You can add a concentration to your degree program, but one is not required for completion of the program. Available concentrations are Health Professions Education (9 additional credits), Gerontology for Health Administrators (9 additional credits), Health Informatics (6 additional credits) and Sustainability Management for Health Care (6 additional credits).

ACHE is a registered trademark of the American College of Healthcare Executives.

AUPHA is a registered trademark of the Association of University Programs in Health Administration.
