In today’s competitive global economy, organizations need the best information possible. To help prepare you for leadership in this high-demand field, University of Phoenix offers the Doctor of Management in Organizational Leadership with a Specialization in Information Systems and Technology (DM/IST) degree program.

Taught by current industry experts, this rigorous doctoral program can take your leadership skills to the next level. The relevant and applicable curriculum provides the theory and technique needed to develop effective solutions for today’s rapidly evolving field of information technology. Through progressive coursework, doctoral students also learn the type of critical-thinking, problem-solving and collaboration skills that lead to success in most working environments.

**Become a force for change in the IT industry.**

**Graduates will be able to:**
- Conduct research as a foundation for executive action.
- Demonstrate innovation in developing new IT models to explain, forecast, support and improve the strategic, tactical and operational performance of organizations.
- Integrate and align IT initiatives with organizational strategy.
- Lead the IT decision-making process toward positive outcomes.
- Provide leadership to improve your organization, industry and community.

**As a doctoral student, you can depend on:**
- An integrated dissertation process that begins early in your program to maximize success and relevance
- Three-to-eight day residencies where you will network and study with professionals in your fields
- Support from a dissertation chair and committee
- Research centers that are organized to help make meaningful contributions to our communities and influence change in our fields
- A three-day, no-cost Doctoral Success Orientation that gives you a tour of the University’s online learning platform and resources before you begin your first course
- Help transferring credits for prior academic and professional experience
