

CACREP Program Outcomes Report 2016

Arizona Campuses (Phoenix and Southern Arizona)

In May 2016, 164 students were enrolled in the University's CACREP-accredited Clinical Mental Health Counseling ("CMHC") program at the Arizona campuses. Between June 1, 2015 and May 31, 2016, 47 students graduated. Approximately 18% of students who were admitted to the CMHC program between September 1, 2011 and August 31, 2012 completed the program within the expected time period.¹ As reported by NBCC, the pass rate for graduates from the Arizona Campuses who took the NCE exam between June 1, 2015 and May 31, 2016 was 100%. In accordance with CACREP policy, to calculate the job placement rate the University surveyed graduates within 180 days following graduation. Forty-two percent (42% or 20/47) of graduates responded to the survey. Of the graduates who responded to the survey, seventy-five percent (75% or 15/20) reported having either (i) found full-time placement in a recognized occupation for which the program prepared them; (ii) enrolled in a doctorate program; or (iii) accepted full-time occupational placement as a volunteer (i.e., with an international relief organization) within their field of training or a related field, within 180 days of program completion. Non-responses to the survey did not factor into the placement rate.

- Number of graduates in the CMHC program: 47
- Program completion rate: 18%
- NCE pass rate: 100%
- Job placement rate: 75%

Utah Campus

In May 2016, 138 students were enrolled in the University's CACREP-accredited CMHC program at the Utah campus. Between June 1, 2015 and May 31, 2016, 43 students graduated. Approximately 18% of students who were admitted to the CMHC program between September 1, 2011 and August 31, 2012 completed the program within the expected time period.¹ The NCE is not required for licensure in Utah, though some students may take it outside of program. Under those circumstances, NBCC does not report results to the institution. University of Phoenix surveyed its Utah graduates about the NCE exam. Of the Utah graduates who responded to the survey, four reported they had taken the NCE exam between June 1, 2015 and May 31, 2016. All who took the exam reported passing it. Accordingly, the NCE exam passing rate was 100%. In accordance with CACREP policy, to calculate the job placement rate the University surveyed graduates within 180 days following graduation. Twenty-seven percent (27% or 12/43) of graduates responded to the survey. Of the graduates who responded to the survey, sixty-seven percent (67% or 8/12) reported having either (i) found full-time placement in a recognized occupation for which the program prepared them; (ii) enrolled in a doctorate program; or (iii) accepted full-time occupational placement as a volunteer (i.e., with an international relief organization) within their field of training or a related field, within 180 days of program completion. Non-responses to the survey did not factor into the placement rate.

- Number of graduates in the CMHC program: 43
- Program completion rate: 18%
- NCE pass rate: 100%
- Job placement rate: 67%

¹Students must complete this program within 5 years of enrollment.
