

# CACREP Program Outcomes Report 2018

## Phoenix Campus

In May 2018, 86 students were enrolled in the University's CACREP®-accredited Clinical Mental Health Counseling (CMHC) program at the Phoenix Campus. Between June 1, 2017, and May 31, 2018, 24 students graduated. Approximately 47 percent of students who were admitted to the CMHC program between Sept. 1, 2013, and Aug. 31, 2014, completed the program within the expected time period. The NCE is not required for licensure in Arizona, though some students may take it outside of the program. Under those circumstances, NBCC does not report results to the institution.

In accordance with CACREP policy, to calculate the job placement rate, the University surveyed graduates within 180 days following graduation. Thirty percent (7 out of 24) of graduates responded to the survey. Of the graduates who responded, 71 percent (5 out of 7) reported having either (i) found full-time placement in a recognized occupation for which the program prepared them; (ii) enrolled in a doctoral program; or (iii) accepted full-time occupational placement as a volunteer (i.e., with an international relief organization) within their field of training or a related field. Non-responses to the survey did not factor into the placement rate.

- Number of graduates in the CMHC program: 24
- Program completion rate: 47%
- Job placement rate: 71%

## Utah Campus

In May 2018, 82 students were enrolled in the University's CACREP®-accredited CMHC program at the Utah Campus. Between June 1, 2017, and May 31, 2018, 43 students graduated. Approximately 65 percent of students who were admitted to the CMHC program between Sept. 1, 2013, and Aug. 31, 2014, completed the program within the expected time period. The NCE is not required for licensure in Utah, though some students may take it outside of the program. Under those circumstances, NBCC does not report results to the institution.

In accordance with CACREP policy, to calculate the job placement rate, the University surveyed graduates within 180 days following graduation. Twenty-six percent (11 out of 43) of graduates responded to the survey. Of the graduates who responded, 82 percent (9 out of 11) reported having either (i) found full-time placement in a recognized occupation for which the program prepared them; (ii) enrolled in a doctoral program; or (iii) accepted full-time occupational placement as a volunteer (i.e., with an international relief organization) within their field of training or a related field. Non-responses to the survey did not factor into the placement rate.

- Number of graduates in the CMHC program: 43
- Program completion rate: 65%
- Job placement rate: 82%
