

CACREP Program Outcomes Reports 2015

Arizona Campuses (Phoenix and Southern Arizona)

In May 2015, 212 students were enrolled in the University's CACREP-accredited Clinical Mental Health Counseling program at the Arizona campuses. Between June 1, 2014 and May 31, 2015, 65 students graduated. Approximately 15% of students who were admitted to the CMHC program between September 1, 2010 and August 31, 2011 completed the program within the published program length. The pass rate for graduates who took the NCE exam was 100%. In accordance with CACREP policy, to calculate the job placement rate the University surveyed graduates within 180 days following graduation. Thirty-seven percent (37% or 24/65) of graduates responded to the survey. Of the graduates who responded to the survey, eighty-three percent (83% or 20/24) reported having either (i) found full-time placement in a recognized occupation for which the program prepared them; (ii) enrolled in a doctorate program; or (iii) accepted full-time occupational placement as a volunteer (i.e., with an international relief organization) within their field of training or a related field, within 180 days of program completion. Non-responses to the survey did not factor into the placement rate.

- Number of graduates in the CMHC program: 65
- Program completion rate: 15%
- NCE pass rate: 100%
- Job placement rate: 83%

Utah Campus

In May 2015, 170 students were enrolled in the University's CACREP-accredited Mental Health Counseling program at the Utah campus. Between June 1, 2014 and May 31, 2015, 61 students graduated. Approximately 35% of students who were admitted to the MHC program between September 1, 2010 and August 31, 2011 completed the program within the published program length. The school did not have access to raw data for the NCE exam for Utah graduates, so it relied on survey data to determine the pass rate for Utah graduates who took the NCE exam. Of the 24 Utah graduates who responded to the survey, 22 reported they had not yet taken the NCE Exam. Both students who reported having taken the NCE exam reported that they passed it. Accordingly, the NCE exam passing rate was 100%. In accordance with CACREP policy, to calculate the job placement rate the University surveyed graduates within 180 days following graduation. Thirty-nine percent (39% or 24/61) of graduates responded to the survey. Of the graduates who responded to the survey, eighty-three percent (83% or 20/24) reported having either (i) found full-time placement in a recognized occupation for which the program prepared them; (ii) enrolled in a doctorate program; or (iii) accepted full-time occupational placement as a volunteer (i.e., with an international relief organization) within their field of training or a related field, within 180 days of program completion. Non-responses to the survey did not factor into the placement rate.

- Number of graduates in the MHC program: 61
- Program completion rate: 35%
- NCE pass rate: 100%
- Job placement rate: 83%
