Master of Science in Nursing
Concentration in Informatics (MSN/INF)
Student Learning Outcomes

- Students will be able to apply organizational and systems leadership concepts to the management of human, fiscal, and physical healthcare resources for diverse populations in a variety of settings.

- Students will be able to evaluate processes, systems, and utilize current technology to support continuous quality improvement and improve patient outcomes across the care continuum in a variety of settings.

- Students will be able to synthesize scholarship from a variety of sources and translate to promote implementation of evidence-based practice.

- Students will be able to evaluate healthcare policy, regulatory, legal, economic and sociocultural environments to advocate for patients and effect change in the healthcare system based on their role.

- Students will be able to design and deliver evidenced-based clinical prevention and population care within an interdisciplinary team to serve diverse populations in a variety of local, national, and international settings.

- Students will be able to evaluate ways to utilize nursing informatics to support best patient outcomes.

- Students will be able to distinguish the regulatory requirements impacting use of informatics within healthcare.

- Students will be able to discuss plans for the use of informatics to collect data and support research.

- Students will be able to design systems to disseminate data to support decision making.
