Control the process and your career.

Everything revolves around project managers. Organized and action-focused, PMs are an essential to business success. Because while PMs don’t code, design or engineer, they’re essential to those actions getting done on time and on budget. Our Project Management Certificate (undergraduate) program teaches the project planning, executing and controlling processes you’ll need to be the one who keeps the wheels in motion. It features electives around program management, negotiation or agile and scrum methodologies.

Coursework in this certificate program aligns to Project Management Institute (PMI®) standards and helps prepare you to take the Project Management Professional (PMP®) or Certified Associate in Project Management (CAPM®) exams.

Leverage your certificate to pursue a Project Management career in a variety of industries, including:

- Health care
- Banking
- Manufacturing
- Business services
- Government
- Technology

Learn how to:

- Apply the principles and practices of project management in a dynamic business environment to advance organizational goals.
- Implement problem-solving adapted through project management techniques to address organizational challenges.
- Use appropriate business tools, resources and processes to mitigate risk.

Study a core curriculum that includes:

- Project estimating and control techniques
