

COST OF PROGRAM:

This program is a Direct Assessment program, which is offered using a nonstandard term academic year comprised of four 12-week terms. Students can choose how many courses, and associated CUs (typically 3 CUs per course), they complete each term. Tuition for University of Phoenix Direct Assessment programs is charged at a fixed amount per enrolled term regardless of the number of courses/CUs in which students are enrolled for that term. Therefore, while the amount charged per term is fixed, the total estimated tuition charges for this entire program depend on the pace at which courses/CUs are completed. The table below provides three estimated total tuition charges for the program based on the number of courses/CUs completed per term. Students must be enrolled in a minimum of 6 CUs in a term to be in Active Full-Time Enrollment Status, and cannot be enrolled in more than 12 CUs in a term.

*The University of Phoenix Bachelor of Science in Health Management (Competency Based-DA) program is a 120 CU program. The admission requirements for the program include a minimum of 30 program-applicable college-level credits, that are applied to the Bachelor of Science in Health Management (Competency Based-DA) program as satisfying 30 CUs. The remaining 90 CUs constitute the maximum total number of CUs that can be completed at University of Phoenix, upon which the total estimated tuition charges noted above is based. You are signing this agreement before formal evaluation or acceptance of transfer credits. Accepted and applied transfer and prior learning credits will decrease the total tuition by the cost per credit hour. The cost of tuition, books, and materials and your total charges may increase or decrease based on the actual number of courses and competency units required to complete this program.

GRADUATION RATE: N/A

This program is new. Therefore no relevant data is available at this time regarding the percentage of students attending online who graduated from the program during the last two calendar years.

940 CMR 31.03 defines graduation rate as the number of students who received certificates, diplomas, or degrees in the program during the latest two calendar years, divided by the number of students who enrolled in the program during the latest two calendar years. This required definition may result in a graduation rate greater than 100% when the number of students who enrolled in the program during the time period is lower than the number of students receiving certificates, diplomas, or degrees during the time period because the required definition does not consider the total enrollment of the program over the time period. Similarly, the required definition may result in other disproportionately high graduation rates in the event that the number of students who enroll during the time period is less than the total number of students in the program who are eligible to receive certificates, diplomas, or degrees during the time period because the required definition does not consider the total enrollment of the program over the time period. Alternatively, the required definition may result in disproportionately low graduation rates in the event that the number of students who enroll during the time period exceeds the total number of students in the program who are eligible to receive certificates, diplomas, or degrees during the time period because the required definition does not consider the total enrollment of the program over the time period. A Graduation Rate of "N/A" indicates that there were no students who received certificates, diplomas, or degrees in the program during the latest two calendar years and no students who enrolled in the program during the latest two calendar years.
