Bachelor of Science in Applied Psychology with a concentration in Media and Technology

Approx. program length: 4 years
Credits: 120
Cost per credit: $398
Format: Online

Utilize tech to enhance customer experience

Understand the role media and technology play in human interactions with a Bachelor of Science in Applied Psychology with a concentration in Media and Technology. Become an expert at using media and technology to enhance customer experience and influence customer behavior in industries such as business, education, social services and government. You’ll also be able to apply psychological theories and concepts to influence healthy technology-mediated relationships and learning.

In this BS in Applied Psychology/Media and Technology program, you’ll study:

- The application of psychological principles to the evolving world of apps, social media and digital interaction
- The benefits and potential harmful effects of technology on society
- The influence of media and social media on behavior
- The impact of digital technology on business, cybersecurity and social media
- Skills that translate across a variety of industries, such as healthcare, business and government

Specialize your degree by choosing electives in Business, Economics, Human Resources, Marketing, Diversity, Culture, Communication, Global Perspectives, Journalism, Media or Information Systems. You can complete your degree in four years, and you’ll take just one 5-week course at a time so you can balance school with work and life.
