Take your tech skills further

You've run cables, built computers, set backup and managed your queues — now it's time to run an entire information system. Move beyond the basics with a Master of Information Systems that helps you learn the technical and leadership skills needed to develop and manage IT systems. Your MIS degree can stand on its own, or you can specialize it with a graduate certificate in [Business Analytics](#) or [Cybersecurity](#).

In this MIS program, you'll learn to:

- Generate the vision, direction and strategy for an information system
- Create, test and deploy an information system
- Manage information privacy, accessibility and ownership
- Understand the strategic implications of emerging technologies
- Meet regulatory, compliance and security issues

Your degree can be completed in as little as 20 months. And, you'll take just one 6-week course at a time, so you can balance work and life on the path to your degree.

What sets us apart?

When you choose our MIS, you can:

Learn from IT pros

Our programs integrate real-world IT principles taught by faculty with an average of 26 years of experience in industry roles such as CEOs, CIOs and IT directors.

Finish your degree

faster

Transfer eligible college credits or apply to have relevant industry certifications evaluated for potential credit.

Learn on your schedule

Designed to fit into the lives of busy working adults, our Master of Information Systems can be completed in short, manageable, 6-week courses.

Projected job growth:

12%

According to [Bureau of Labor Statistics](#)

Job opportunities

According to the Bureau of Labor Statistics, the job growth for computer and information systems managers is projected to be 12 percent between 2016 and 2026. A Master of Information Systems degree can help prepare you to be an:

- Information systems director
- Information systems manager

Networking opportunities

Access powerful networking tools through our PhoenixLink™ career services platform. Take advantage of personal career coaching. Search and apply for jobs, or make your resumé visible to employers. And connect with employers and alumni through career fairs and mixers. It's all about connections. And we help you make them.

Learning outcomes

Along with the knowledge and skills related to the University Learning Goals, students who graduate from the College of Information Systems and Technology should gain program-specific knowledge, skills and abilities. Each college or school creates a set of Program Student Learning Outcomes (PSLOs) to describe the knowledge, skills or attitudes students will possess upon completion of the program of study. By the time you complete your Master of Information Systems, you should be able to perform these [learning outcomes](#).

The goal of accreditation is to ensure that education provided by institutions of higher education meets acceptable levels of quality. Accreditation is your assurance the University meets quality standards.

Institutional accreditation

Regional accreditation is an institution-level accreditation status granted by one of six U.S. regional accrediting bodies. Accreditation by more than one regional accrediting body is not permitted by the U.S. Department of Education.

University of Phoenix is accredited by the Higher Learning Commission (HLC), hlcommission.org. Since 1978, University of Phoenix has been continually accredited by the Higher Learning Commission and its predecessor.
