Schedule

Your academic counselor will help schedule your courses for an online Master of Health Administration.

What you'll learn

When you earn your master's in health administration online, you'll be equipped with a concrete set of skills you can apply on the job.

You'll learn how to:

- Evaluate industry and organizational dynamics in the healthcare environment.
- Generate core business strategies based on innovative concepts developed in the program.
- Construct strategic relationships with diverse stakeholders across the health sector to achieve business objectives with a current or desired employer.
- Develop a leadership identity that reflects traits required in complex healthcare environments.
- Produce a personal legacy that fosters investment in people and the community to drive the future of health care.
- Foster the ability to create and execute operational improvement plans that address transformation, communication, and execution elements within the sector.

Mission

The Master of Health Administration prepares early- to mid-careerists in the health sector, who desire to pursue a degree while employed, with the competencies necessary to grow professionally, facilitate cross-system transformation of the sector as driven by the Institute for Healthcare Improvement's (IHI) Triple Aim, and engage with their communities.

Vision

Creating a new type of health sector leader who is authentic, transparent, and creative – who thinks critically and with agility, comfortable at the intersection of industry expertise and academic scholarship.
