Learn the business of healthcare

Discover ways to solve complex healthcare management problems through a Graduate Health Care Management Certificate. It's designed for students who want to develop business management skills that can be applied in healthcare services organizations, private or group practices, or the health insurance industry.

In this certificate program, you'll:

- Learn how to identify, analyze and solve complex management problems
- Study decision models used by healthcare managers
- Learn about the tools, technologies and processes needed for managing change
- Understand current issues in health law and ethics

You'll complete your certificate online in as little as eight months by taking just one 6-week course at a time, so you can balance work and life on the path to your graduate certificate.

What sets us apart?
