Health Information Systems Certificate (Undergraduate)

Healthcare and information technology are two rapidly growing job sectors. Earn your Health Information Systems Certificate online in approximately 10 months to help elevate your career and bring IT skills into healthcare. You'll focus on database concepts, information networking, system design, and project management of health information systems. This certificate aligns with the Healthcare Information and Management Systems Society (HIMSS) Certified Associate in Healthcare Information and Management Systems (CAHIMS) national exam.

You'll learn how to:

- Understand healthcare industry terms for IT professionals
- Implement strategies for success in health services administration
- Manage the foundation of IT in the healthcare environment
- Manage risks present in healthcare information systems
