## Put the work into network

Be the resource in your organization who understands all things networking. Our Advanced Networking Certificate delivers foundational instruction in network protocols, operating systems, architecture, design and management. You'll complete your certificate in as little as 7 months by taking just one 5-week course at a time, so you can balance work and life on the path to your certificate.

In this certificate program, you'll study:

- Windows Server configuration
- Methodology used to design a network
- Server maintenance
- Print and file server configuration
- Network modeling and performance measurement

## Learn skills employers are looking for

This program can help you prepare to sit for these industry certifications: CompTIA® Cloud+® and Microsoft® MCSA – Administering a SQL Database Infrastructure and Provisioning SQL Databases.

Why does that matter? Certifications connect you to a community of networking professionals so you can collaborate with other experts. They also show employers you're serious about understanding networking strategy.

## What sets us apart?

When you choose our Advanced Networking Certificate, you can:

### Learn from IT pros

Our programs integrate real-world IT principles taught by faculty with an average of 26 years of experience in industry roles such as CEOs, CIOs and IT directors.

### Finish your degree faster

Transfer eligible college credits or apply to have relevant industry certifications evaluated for potential credit.

### Prepare for your career

Gain IT skills through courses that align with national certification exams from CompTIA and Microsoft.

## Networking opportunities

Access powerful networking tools through our PhoenixLink™ career services platform. Take advantage of personal career coaching. Search and apply for jobs, or make your resumé visible to employers. And connect with employers and alumni through career fairs and mixers. It's all about connections. And we help you make them.

## Learning outcomes

Along with the knowledge and skills related to the University Learning Goals, students who graduate from the College of Information Systems and Technology should gain program-specific knowledge, skills and abilities. Each college or school creates a set of Program Student Learning Outcomes (PSLOs) to describe the knowledge, skills or attitudes students will possess upon completion of the program of study. By the time you complete your Advanced Networking Certificate, you should be able to perform these [learning outcomes](#).

The goal of accreditation is to ensure that education provided by institutions of higher education meets acceptable levels of quality. Accreditation is your assurance the University meets quality standards.

## Institutional accreditation

Regional accreditation is an institution-level accreditation status granted by one of six U.S. regional accrediting bodies. Accreditation by more than one regional accrediting body is not permitted by the U.S. Department of Education.

University of Phoenix is accredited by the Higher Learning Commission (HLC), [hlcommission.org](http://hlcommission.org). Since 1978, University of Phoenix has been continually accredited by the Higher Learning Commission and its predecessor.

Course length:

**5 weeks**

Total credits required:

**18**

Max. number of transfer credits:

**3**

## Requirements and prerequisites
