

Graduate Health Care Informatics Certificate

Transform the way health informatics optimizes vital health care information.

[GET STARTED >](#)[CALL US 866.766.0766 >](#)

Objectives

This certificate program is designed for health care and nurse professionals interested in pursuing or advancing in careers associated with health care informatics and technology. Individuals with little or no background in Informatics receive an overview of informatics as it relates to delivery within a health care facility. The program is designed to provide the learner with current knowledge in concepts of health care informatics, systems life cycle, and data management. The 10 credit-bearing specialization is available as a certificate program for postbaccalaureate students. The four courses in the informatics specialization certificate program are available at campuses offering nursing or health care degree programs using a variety of delivery methods.

Requirements and Prerequisites

Graduate Health Care Informatics Certificate requires a minimum of **10** credits, which may come from a combination of required and elective courses.

Core Courses

Introduction To Graduate Study In Health Sciences/nursing	HCS504
Concepts Of Health Care Informatics	HCI500
Systems Life Cycle	HCI510
Data Management And Design	HCI520

While widely available, not all programs are available in all locations or in both online and on-campus formats. Please check with a University Enrollment Representative.
